

Free Trade Agreement (FTA) Analyzer

ONESOURCE® FTA Analyzer is a decision-making and analytics tool that delivers up-to-the-day reports detailing which sourcing countries, trade lanes, and trade agreements provide the most favorable return on investment, based on company-specific trade data.

Duty optimization is essential for supply chain success

Unprecedented supply chain disruptions have impacted many companies, causing them to rethink their traditional utilization of Free Trade Agreements “FTAs.” As countries continue to sign new FTAs, companies that fail to monitor new FTA opportunities could potentially end up paying significantly more in duties per year.

An effective duty optimization strategy — one that includes capitalizing on FTA benefits as they continue to change — is critical to delivering optimized landed costs.

Solution features

FTA Optimization Reports

- Ranked reports on trade lanes, products, countries, and FTAs that can maximize savings.

Unlimited FTA Analysis

- Avoid spending time manually researching trade lane FTA opportunities for individual products.
- With unlimited searches available on demand, gain operational efficiency and access the FTA intelligence you need, when you need it.

Rely on a comprehensive repository of global trade content

- 500+ global FTAs monitored for changes to eligibility for member countries and preferential rates of origin.
- A global team of trade content analysts collectively speaking over 30 languages that cover trade regulatory data worldwide.

Key benefits

Quickly determine which FTA will lead to the largest savings and best ROI.

- Create meaningful rationales for trade lane decisions that can be “sold” to leadership.
- Prioritize the most impactful duty optimization opportunities to maximize savings.
- Stay alert to changes by revalidating and re-optimizing your supply chain and making timely adjustments.
- Save time manually researching a myriad of data points.

FTA Analyzer at a glance

Challenges	Results
High volume of products	Rely on trade lane data uploads that drive FTA analysis
Shipping to many countries	Ensure accurate FTA duty rate content
Multiple FTAs available	Rely on 500+ FTAs monitored for changes
Insufficient time to analyse and evaluate the best FTAs to maximize savings and operational efficiency	Quickly identify opportunities for FTA savings

*FTA Analyzer transforms a resource-intensive analysis process and provides many-to-many analysis between countries and FTAs supported in the **ONESOURCE Global Trade Content** database.*

A new supply chain era has already begun

New FTAs, trade wars, the pandemic, and other geopolitical events have triggered companies to explore diversifying their supply chains and survey their changing FTA opportunities. FTA Analyzer can help companies navigate the new supply chain era to find the FTA that provides the most savings.

Start by speaking to Thomson Reuters professionals — we will be able to guide you by:

- Determining your needs and requirements
- Sharing how automated analysis can rapidly identify FTA savings in your supply chain
