AUMENTUM TAX
ALL YOU’LL EVER NEED
AUMENTUM TAX

OUR POWERFULLY COMPREHENSIVE AND FLEXIBLE TAX BILLING, COLLECTION AND MANAGEMENT SOLUTION HELPS YOU TO ACCURATELY AND FAIRLY APPLY PROPERTY TAXES ACROSS YOUR JURISDICTION
OVER THREE THOUSAND YEARS

WITH OVER THREE THOUSAND PERSON-YEARS OF COLLECTIVE TAX SOFTWARE DEVELOPMENT EXPERIENCE, OUR STAFF DEVELOPED THE MOST IN-DEPTH TAX SOLUTION AVAILABLE TODAY

Easy-to-use and configure, our browser-based Thomson Reuters Aumentum Tax system gives you a complete range of tax tools including levy management, billing, collection cashing, and special assessments. It maintains unlimited tax years and also automates settlements, balances and roll-overs. And with immediate access to information and an intuitive user interface, your staff will be able to provide a higher level of taxpayer service.

IT DOES IT ALL
Part of our government revenue management suite, Aumentum Tax provides you easy-to-use tools for handling tax related functions—such as managing real and personal property taxes, mobile homes, mineral, motor vehicle and special assessments. It also provides you with user-defined tax units and rate tables; tracks property splits, combinations and transfers, and allows comprehensive searches and inquiries. Plus, it automates delinquencies, tax sales, and interest and penalty calculations.

READY WHEN YOU ARE
Developed on the Aumentum iFramework™, a technology platform built on Microsoft.NET®, Aumentum Tax is a modifiable and ready-to-install, off-the-shelf system. It is completely insulated from technology changes and seamlessly integrated with the entire Aumentum suite of products. This seamless integration provides your staff with the time-saving capabilities of inquiring, data mining, reporting, and workflow to track a parcel from creation through valuation, assessment and taxation.

Crucial point-in-time tax functionality coupled with powerful analysis capabilities ensures maximum revenue attainment, while also promoting taxpayer education and accountability.
AUMENTUM TAX KEY COMPONENTS

Records—provides a single data entry source delivering time savings and increased data accuracy to your jurisdiction. It is the core component of every Aumentum installation. It provides a complete inventory of the parcels, filings, business revenue or motor vehicles along with a list of the legal parties who have an interest in the inventory.

Assessment Administration—is designed to handle the most complex property assessment rules—it correctly maintains the property inventory and valuation data used to determine assessed values for the assessment roll. These functions include a calculation engine and triggering of automatic correction events.

Special Assessments—creates, maintains and calculates amounts for special assessment districts and projects. Various methods are utilized to accommodate different requirements for the jurisdictions, including amortization of entire projects over many years.

Levy Management—provides the calculation engine to compute payment terms, rate management, tax, charges and revenue forecasting from taxable values.

Billing Engine—formats and produces property tax bills, business licenses, motor vehicle documents, assessment notices and other bills. This includes flexibility to sort and group bills, include messaging on the bills based on user-defined flags, plus user-directed mapping to determine how charges and descriptions will appear on the bills.

Cashiering—provides user and batch processes to calculate appropriate interest, penalties and fees and to collect and record payments in real time; over the counter or through remote cashiering devices. Cashiering is fully integrated with the Aumentum Suite, and can be configured to collect many different types of revenue.

Accounts Receivable—is the repository for all charges, payments and credits. It calculates late payment interest, penalties and fees. It also provides methods of managing changes and correcting payments, as well as the ability to process surplus monies.

Distribution—calculates the tax revenue due to the taxing authorities for a given time period based on amounts levied and monies collected. This includes the ability to calculate withholding commissions from disbursements to agencies and producing disbursement records.

Delinquents—determines what bills are delinquent, automatically calculates additional interest, penalties and fees and facilitates the creation of notices. Includes write-off functionality, payment plans and has a bankruptcy program that allows for creation of the filing.

Tax Sales—facilitates all the activities leading up to and including the auction of liens or the auction of the property itself due to severe delinquency. Includes maintaining of buyer information and details, supports local or internet tax sales, redemption of properties and redemption payouts via ACH, along with e-mail notification to lienholders or certificate holders and full support of 1099 processing.

Business Revenue—is a comprehensive, automated Business Tax solution fully integrated with the Aumentum suite. This includes Business Tax as well as Trust Tax or self-reporting taxes. It has a complete import and discovery/preview tool for accepting data from external sources. It also integrates with reporting services, and supports customization of standard system reports, filings, and extracts utilizing Aumentum-provided system templates.
AUMENTUM TAX FEATURES

Information Center—The general query interface on the Information Center is the perfect tool for today’s “information worker.” It displays revenue objects, tax bills and data of legal parties. In addition to providing your office extensive information regarding property tax and tax billing data, it provides your staff the ability to search based on many different attributes including: situs and mailing addresses, phone numbers, email addresses, PI, owner and tax bill.

System-wide Integration—Aumentum Tax allows data to be collected once, and automatically populated into other integrated systems including: property assessment, records management and E-Government. This increases productivity and accuracy, while eliminating redundant entries and duplication errors.

Unlimited Event Log—Through an unlimited event log and transaction history which chronicles every transaction and event associated with a specific property, Aumentum provides your office the ability to provide fast, accurate and superior customer service. Search filters provide quick access to the needed information which includes notes with key words to augment clarity of records.

High Speed Batch Remittance—High speed processing of batch remittance files from lenders, individuals and other institutions increases productivity and accuracy, as well as the interest accrued from faster reconciling and deposits of revenues. Reports can be pre-scheduled to run in an unattended setting—no longer tying up workstations—and to provide e-mail notification and delivery when files are complete.

Management Console—Via one central location, your supervisors can review accurate and continually refreshed visual data of office and staff activities. This includes collections in real-time by location, source, service, and tender details by session for a selected location or till. This allows supervisors to make immediate decisions such as leveling workloads between departments or offices.

GIS Integration—The use of Aumentum GeoAnalyst’s integration with Esri’s ArcGIS® Server increases the consistency of analytical data. All information can be overlaid on maps, allowing you to spot trends by geographic areas, such as delinquencies and foreclosures. Additionally, this tool can integrate with outside sources such as census data to create maps that may aid in making important decisions such as revenue forecasting.

Unlimited History—Provide your office with a historical view of all transactional data, including a year-to-year comparison of collected revenue. This is critical for spotting various trends and the development of projections, future planning and providing robust customer service to constituents who need historical tax information.
LOWER COST OF OWNERSHIP
BUILT FOR MAXIMUM FLEXIBILITY

Aumentum is a browser-centric application built on our internally developed iFramework platform utilizing Microsoft.NET technology. It provides fast and secure access to databases throughout all Aumentum applications—helping you to easily navigate from screen to screen, interact-in-workflows and run reports and batch jobs. Aumentum supports robust business features and facilitates legislative updates while insulating that functionality from technology updates and changes.

Aumentum has been designed to be highly configurable and adaptable providing you with a wider range of uniform application features and benefits—at a lower cost of acquisition and ownership. Aumentum not only saves you money, but it is easier and faster to deploy, helping to reduce the time and project management cycle from installation to operation. This time and cost savings, coupled with Aumentum’s flexible service-oriented architecture which allows for integration with other government information management systems, results in reduced risk for you.
GLOBAL LEADERSHIP

Thomson Reuters is the world’s leading source of intelligent information for governments, businesses, and professionals. Combining industry expertise with innovative technology, we deliver critical information to leading decision makers.

Aumentum simplifies the revenue management lifecycle for governments around the world. Our unique combination of technology enhanced by experience enables you to optimize revenue generation, support sustainable growth and improve services to the public.
