Gaps in your company’s global tax system can cause costly custom fixes and manual workarounds. So, isn’t it time to rethink how you calculate transaction taxes in SAP? Even the most powerful ERP systems can’t handle the complexity of global transaction tax compliance — which leaves your staff to fill in the gaps. ONESOURCE® Determination works seamlessly with SAP S/4HANA using the SAP Tax Service framework to deliver scalable, automated transaction tax determination. Stay on top of constantly changing indirect tax rates and determine your company’s liability for GST, VAT, excise tax, and other country-specific taxes regardless of your corporation’s size or geographic reach.

Built using cloud native technology and leveraging more than 10 years of experience in implementing SAP tax automation worldwide, ONESOURCE Tax Service Integration for SAP S/4HANA is the version of our SAP integration that uses the Tax Service component provided by SAP under their Localization Hub. ONESOURCE Tax Service Integration for SAP S/4HANA delivers real-time tax decisions at the point of transaction, directly to your existing SAP platform.
**Fully compatible with SAP Tax Service**

Our Tax Service integration for SAP S/4HANA is 100% compatible with the SAP Localization Hub Tax Service framework provided by SAP. This integration leverages cloud-native technologies, like auto-scaling, self-healing, and zero down-time for upgrades.
