

ONESOURCE Determination for NetSuite

Get sales and use tax, VAT, and GST right the first time, every time

Successful companies understand that using an Enterprise Resource Planning (ERP) system like Oracle® NetSuite to streamline operations can boost productivity, improve visibility, and set the foundation for compliance. But even the most powerful ERP systems can't handle the complexity of global transaction taxes — which leaves your staff to fill in the gaps. That's why we've integrated ONESOURCE® Determination with NetSuite. ONESOURCE Determination for NetSuite makes it easy to stay on top of constantly changing indirect tax rates and calculate your company's liability for sales tax, use tax, GST, VAT, excise tax, and other country-specific taxes regardless of your corporation's size or geographic reach.

ONESOURCE makes it possible to automate everything from tax calculation and certificate management to turnkey reporting and filing returns. ONESOURCE Determination is an intelligent determination engine, helping you streamline transaction tax calculations everywhere you do business. Get real-time tax decisions at the point of transaction directly to your existing NetSuite platform and say goodbye to manual work. Better manage your tax requirements in an ever-changing tax landscape and gain a complete view of your tax liability from a single, unified, easy to implement system that's scalable to meet your company's evolving needs.

FEATURES

ONESOURCE

Single Unified End-to-End Tax Solution	✓
Intelligent Global Tax Determination	✓
Comprehensive Global Product and Service Categories	✓
Exemption Certificate Management and Address Cleansing	✓
Use Tax Accrual	✓
Reconciliation Reporting	✓
Tax Error Recalculation and Audit Error Reprocessing	✓
Offline Tax Fallback Configuration	✓

Seamless integration

Better manage tax liability through our seamless integration with your existing sales and purchase process. Each time you run a sales or buying transaction in NetSuite, ONESOURCE processes the data through our tax determination engine, instantly calculating the precise sales tax, use tax, VAT, or GST, and applying it back to the transaction in NetSuite. In addition to supporting standard sales and purchase transactions, the integration with ONESOURCE also supports NetSuite's SuiteCommerce Standard and Advanced modules.

Connect your ERP system to manage global transaction tax.
