SIMPLIFIED PROCESSES.
ELEVATED PERFORMANCE.

Move forward with integrated tax solutions from ONESOURCE, powered by Oracle Cloud.
The future of global indirect tax determination is here.

When you're selling and buying goods and services around the world, you need precise and intelligent indirect tax determination for each transaction. And when you're facing pressure to cut costs, be more nimble, and accelerate growth, you need a solution that can remove human error, system downtime, and risk.

Reimagining the world of sales and use, VAT, and GST — in the cloud.

The robust integration of ONESOURCE Indirect Tax and Oracle Cloud ERP ensures that you'll get tax right — the first time. This integration puts ONESOURCE closer to the Oracle Cloud ERP system by running on the same Oracle Cloud Infrastructure (OCI), which will give you:

- Increased speed of calculation and decreased response time.
- Seamless integration with the Oracle Cloud ERP tax API for real-time tax calculations and updates.
- Cloud-native technologies that leverage the Oracle Autonomous Database to perform auto-scaling, self-healing, and instant upgrades.
- The power of Thomson Reuters® SSAE 18 and ISAE 3402 certified compliant global tax research.
- Enhanced speed and enterprise-grade availability, stability, and performance.

Now you can automate transactions worldwide without worrying about capacity constraints and security. And you can make functionality enhancements and content updates to the software with zero downtime.

Implement in record time, with less risk.

- Use rapid implementation templates through the simplified Oracle Fusion Tax configuration setup.
- Deploy quickly, using experienced in-house Oracle implementation practice with a mature and vetted implementation methodology.
- Set up tax calculations for custom fields, unique product and service taxability rules, and automated global content updates for UNSPSC/HSN Classifications.
- Configure without coding for your complex tax processes.

Take the burden off your IT teams.

- Tax rates and rules automatically update directly in ONESOURCE Determination.
- Industry-leading global tax content automatically loads into Oracle Cloud ERP.

Make updates in the moment, with no waiting.

- Tax rates and rules automatically update directly in ONESOURCE Determination.

Simplified Processes. Elevated Performance.
Empower your tax and finance teams to be in complete control.

You can rest easy knowing that reliable tax automation and content is protecting your enterprise from costly tax penalties and audits, while supporting your teams with more speed, control, data visibility, and flexibility on a global scale.

Minimize risk and human error.

• Prevent tax penalties with exact tax calculations.
• File on time and ensure better compliance with recording and reporting of tax accounting information.
• Remove AR and AP manual decisions and enable your finance team to focus on more strategic tasks.
• Reduce customer tax issues and reconciliation errors.

Ensure the highest levels of accuracy.

• Perform sub-second tax calculations using a global tax determination engine.
• Gain seamless access to complete U.S. geography content, with full support for Address Lookup inside Oracle Cloud ERP.
• Use detailed regime-to-rate content with either Thomson Reuters or third-party geographies.
• Access tax research monitored for more than 15,000 tax jurisdictions in over 205 countries and territories covering sales and use, VAT, and GST.

Turbocharge speed and productivity.

• Call up tax calculation results saved in ONESOURCE Determination for compliance and audit reporting purposes.
• Manage larger files with enhanced batch process support.
• Shorten turnaround time for Days Sales Outstanding (DSO) and invoice-to-pay.
• Validate vendor-charged tax without any manual user intervention.

Gain more control and flexibility.

• Enjoy better data visibility and proactive issue resolution with the innovative user interface.
• Evaluate and decide on taxing rules for even the most complex taxing rules.
• Get tax calculation support for sales and purchasing on Oracle’s order management, accounts receivable, purchase orders, accounts payable, supplier portal, and OCR AP invoice scanning, and batch invoice imports.
• Remove AR and AP manual decisions and enable your finance team to focus on more strategic tasks.
• Reduce customer tax issues and reconciliation errors.
