Secure document management plus cloud collaboration

Demand for collaborative tools and anywhere/anytime access to information continues to increase. Clients expect the firms they do business with to provide them with an efficient and secure way to collaborate and exchange information.

Onvio Firm Management provides cloud-based, easy-to-use document management, with innovative collaboration capabilities and an intuitive interface. Client collaboration functionality and direct integration with the CS Professional Suite® enable simple user and firm administration, allowing your firm to work seamlessly with your clients to collect source documents and distribute deliverables.

With Onvio Firm Management, you’ll be able to:

• Easily onboard new clients by importing documents from Google Drive, Dropbox, and Box
• Quickly scan and upload documents from other applications
• Find the information you need by using full-text search across a variety of document types, including Microsoft® Word and PDF
• Drag and drop files from desktop and web
• Customize your folder structure to fit your workflow
• Manage clients and staff from a single user-friendly administration module
• Rest easy knowing your data is encrypted whether in transit or at rest on our servers

The Request feature provides a secure location where clients can respond to messages and upload files via encrypted links that allow for easy, safe document sharing. So you never have to worry about sending sensitive data through email or other, less secure methods.

Source document scanning goes mobile

Take photos of source documents with your mobile device and enhance them on the spot with the Onvio Documents and Onvio Client Center apps.
Onvio Firm Management has two mobile apps available for your staff and clients. These apps, Onvio Documents and Onvio Client Center, will give you the document and client collaboration functions of Onvio Firm Management, plus the ability to:

- Take photos of source documents with your mobile device and enhance them in the app (flip, crop, de-skew, flatten, etc.)
- Quickly scan and upload multipage documents with your mobile device’s camera
- Answer client questions with ease, since you’re viewing the same information in real time, even when you’re in the mobile app
