THE SECURE CHOICE FOR THE FINANCIAL INDUSTRY’S PROPERTY TAX NEEDS

Dealing with the complicated requirements of the financial industry can be difficult without proven processes. Tax professionals need to ensure accuracy while reducing risk and multiple data entries. ONESOURCE Property Tax is the most secure and robust property tax solution in the marketplace, and financial institutes across the country count on us to meet complex requirements within their tax departments.

Power and Security

- Thomson Reuters Tier 4 data center is home to hundreds of hosted applications
- System processes are audited annually by third-party SSAE16 and SOX auditors

Disaster Recovery and Continuity

- Triple redundancy, BCP, and disaster recovery programs
- Daily backups stored in off-site facilities
- Industry-leading, four-hour recovery time objective (RTO)

Functionality for the Financial Industry

- Managing global real property tax appeals from several sources
- Managing the process for reporting of property tax appeals and real estate metrics across portfolios
- Consolidation of information from multiple sources in one database
- Flexibility to automate importing and managing data
- Increased visibility across portfolios, with flexible, customizable reporting
- Dashboards and standard reports
- Customizable security rights and access for each user from any location
