

PROPERTY TAX

A COMPLETE END-TO-END SOLUTION

Thomson Reuters ONESOURCE™ Property Tax is the most comprehensive software for managing property taxes on leased assets. Our innovative software eliminates the risk of manipulating data outside the system and provides the tools necessary to manage your property tax work efficiently. With unrivalled data automation, you can assign, allocate and track all critical asset-level information without manual calculations or data entry.

THE ULTIMATE IN AUTOMATION

Streamline and automate time-consuming and labor-intensive property tax functions.

Assign to Assets:

- New location identification and creation
- Assessing jurisdictions national classification – one time for all states
- Taxability, depreciation, and form reporting
- Bill back to lessee's on your schedule

Group and Report Assets:

- By location or consolidated by assessing jurisdiction
Includes controls to prevent duplicate reporting

Allocate to Assets:

- Assessments and tax bills
- Discounts, penalties, interest and non-tax charges

LET ONESOURCE PROPERTY TAX HELP YOU

- Normalize location addresses without third-party services and fees
- Electronic file transfer of allocated taxes supports all industry lease management packages
- Paperless tax bill entry

RELIABLE RECORDS AND AUDIT TRAILS

All critical data is tracked and permanently stored at the leased asset level. For added security and peace of mind, an SSAE16 Type II audit is performed on Thomson Reuters controls, processes and infrastructure each year to ensure full compliance with Sarbanes-Oxley.
