ONESOURCE

Determination Reporting and Analytics

In today's fast-paced business world, where quick scenario-planning and trend analysis are key, it's never been more important for indirect tax teams like yours to be able to run fast reports and get access to all your indirect tax data. ONESOURCE® Determination has the capability to do just that, with our next generation reporting and analytics feature. With our reporting and analytics capabilities, you can quickly and easily build and run reports of whatever size you need. You can also streamline data visualizations and export data to use however you'd like. It's all with the goal of giving you the visibility you need, whenever and however you need it.

Flexible, customizable reports

We know that one size never fits all, and with our reporting enhancements, you can build a report that is just right for you. With drag-and-drop functionality, you can quickly decide which data to include in your reports and which to exclude. Build tailored reports with advanced functionality to just your specifications using our intuitive interface, and save them for the next time you need them. Share your most-used reports across your organization, so that others can view them without having to build a separate report. Don't need a fully custom report? We also have pre-built reports for the most popular needs, including transaction extract, that can still be edited to suit your specific needs.

Data at your fingertips

It's not just about seeing your data with our reporting tools, though; it's about what you can do with it. With ONESOURCE Determination, you can use our best-in-class business intelligence functionality to visualize data and manipulate it as you need to. We also provide connectors for retrieving large data sets from ONESOURCE that can be integrated with your business systems, even down to transaction-level data. And with our partnership with Alteryx, you can do even more with your data than ever before.

THOMSON REUTERS®

With the ONESOURCE Determination reporting functionality, you have:

Scalable reporting structure

Whether your reports are small and targeted or contain millions of transactions, our engine is able to handle it all, producing the reports you need as soon as you need them.

Standard reports

Pre-built, editable starter reports based on the most popular use cases save you time and get you the reports you need most frequently without having to rebuild every time.

Custom reports

Build custom reports to suit your specific needs easily with drag-and-drop functionality so that you can decide which data to include and which to exclude.

Shared reports

For popular reports, build them just once and share them with any users who need to view, making it easy to communicate and collaborate within the platform.

Data visualization and analysis

Use best-in-class business intelligence functionality to easily visualize and manipulate your data, for flexible analytics that suit your unique needs.

Transaction-level data export

Export your data at the transaction level for more advanced or granular analysis.

Get tax right the first time, every time, with ONESOURCE Determination.
