

Introducing the Thomson Reuters K-1 Analyzer™

K-1 software that allows you to extract, review, and aggregate complex K-1 information

The **Thomson Reuters K-1 Analyzer** is cutting-edge software that allows users to quickly extract and aggregate complex non-standard K-1 information so that it can be reviewed and analyzed. It provides a single, standard, structured output for managing K-1s that allows users to eliminate manual effort, so that they can spend time reviewing, analyzing, and gaining insights from their data.

Powered by artificial intelligence (AI) and machine learning, the K-1 Analyzer can read, extract, and analyze K-1 data from front to back, including unstructured footnotes, statements, and disclosures. This web-based, user-friendly tool combines years of K-1 structure refinement, years of machine training with more than 100,000 K-1s, with a continuous learning process that grows smarter with each K-1.

The K-1 Analyzer virtually eliminates the manual work associated with K-1s and enables you to aggregate stacks of K-1s in minutes, rather than days.

The K-1 Analyzer provides users with:

 Structured data Standardize and bring structure to massive volumes of information contained in Schedules K-1	 Increased accuracy Utilize artificial intelligence (AI) to extract and aggregate thousands of data points with ease	 Decreased risk Remove manual keying of data — and the accuracy risk associated with it — from your process
 Investment tracking Easily track and maintain investment basis over time, NOL carryforwards, and foreign transfers over time	 Increased compliance Ensure compliance with foreign disclosure filing requirements and minimize time associated with compliance	 Heightened confidence Know that you've completed all steps for proper compliance with federal, state, and international requirements

Analyze K-1 information effortlessly

Create a high-level summary of each investment. It is searchable, sortable, and allows you to translate federal Forms K-1 to structured format via drag and drop, drill down into federal and state taxable income to view individual income and expense items, and more.

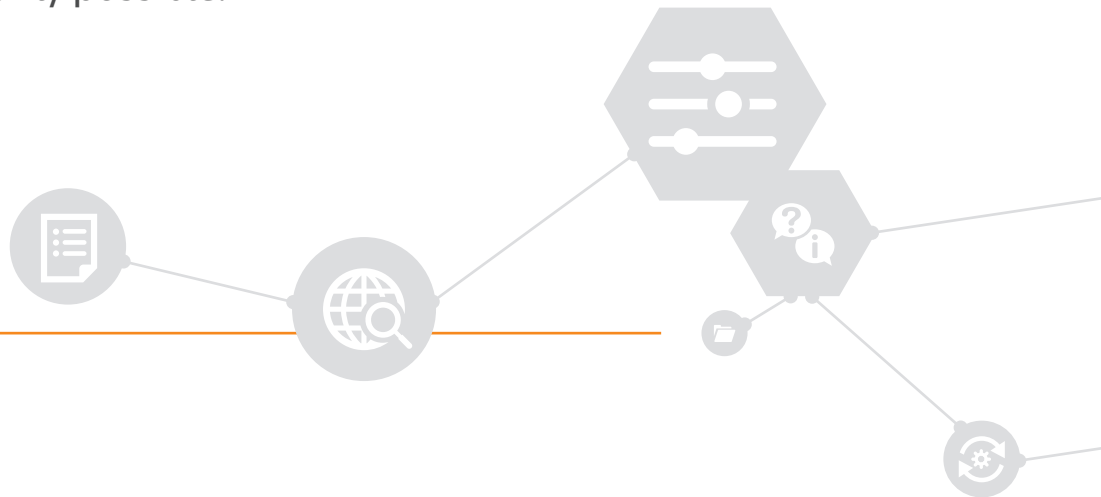

With the new K-1 Analyzer, you can:

- Minimize risk and costly mistakes associated with manual processing work.
- Save time and reduce staff costs associated with K-1 data entry.
- Process schedules K-1 with more speed and accuracy than ever before.
