

# Thomson Reuters Virtual Office CS

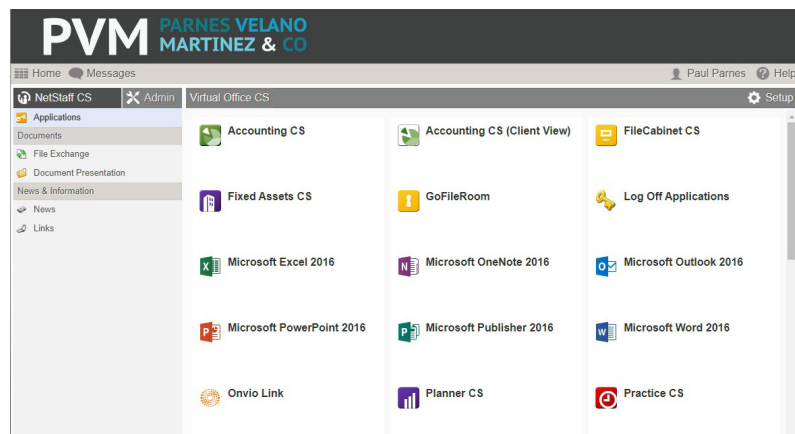

## Access to your software and client data anytime, anywhere

Virtual Office CS provides you with anytime-anywhere access to Thomson Reuters® CS Professional Suite, Microsoft® Office, and Microsoft Exchange® software and files. Employing cloud computing technology, Virtual Office CS is a convenient software delivery method that offers remote 24/7 web access to your software and data, relieving you of the IT burden and ensuring business continuance — no matter what the situation.

In Virtual Office CS, your programs function exactly as if the software were residing locally in your firm; however, all of your programs and data run on our secure servers. We take care of the hardware and software maintenance and updates, leaving you and your staff free to concentrate on what's most important — your clients. All you have to do is log in and go to work.

With Virtual Office CS, your web hosted software (Note: high-speed Internet connection required) performs the same from any computer or laptop running a supported Windows version, as it does on your local hard drive or network.

### Virtual Office CS Portlet

Enjoy anytime-anywhere access to your software and data.

## Powerful, innovative, and easily accessible features

- **Enjoy remote access.** Work from remote offices, client locations, home, or anywhere in between. With any high-speed Internet connection, your software and data are just a click away.
- **Maintain constant communication.** Keep in touch with staff and clients by using Microsoft Exchange. With 24/7 access to the messaging features in Microsoft Exchange, your staff will be able to schedule meetings, stay in contact, and manage tasks quickly and easily. Plus, with the synchronization feature, your Microsoft Outlook® email, calendar, and contacts can be accessed from your iPhone® or Android™ device — or any smartphone using ActiveSync.
- **Maximize staff and resources.** Finding qualified staff can be difficult. Virtual Office CS helps you open up your labor pool to stay-at-home parents and employees who have relocated hundreds, even thousands of miles away.
- **Focus resources on business issues and reduce hardware costs.** Dedicate more effort to managing your business by reducing the amount of time and staff required for software, hardware, and server administration and maintenance. Plus, with Virtual Office CS, you won't have to upgrade your computer hardware as frequently. Instead, let our state-of-the-art infrastructure do the work for you.
- **Enjoy the power of true integration.** Take advantage of true data sharing. With systems designed to work together, your work will flow efficiently from start to finish resulting in higher levels of productivity and profitability.
- **Ensure business continuance.** Keep your business up and running 365 days a year, even in the event of fire, theft, or natural disaster. During any disaster, you can take comfort in knowing that your software and data remain safe in our secure data centers.

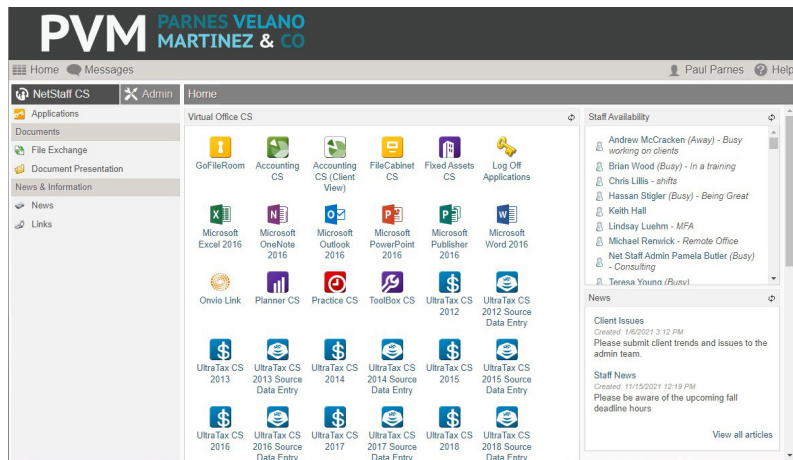

## NetStaff CS and Virtual Office CS – a powerful combination with an intuitive interface

All Virtual Office CS firms automatically have access to NetStaff CS. The access point for all your CS Professional Suite software when licensed in the Virtual Office CS environment, NetStaff CS provides a clean and intuitive interface so you and your staff can easily manage and access all of your hosted services and software in one convenient location. It also comes with optional add-on features so you can expand the services offered to your staff beyond online software access. You can implement firm-wide intranet services for your entire staff, communicate information, and share important files – all through individualized, password-protected portals.

Additional NetStaff CS modules include:

- Staff Availability
- File Exchange
- Account Aggregation (an additional cost incurred)
- News and Links
- Document Presentation
- Stock Quotes

With NetStaff CS, we give you the power to create an environment that fits your business and individual staff needs.

### NetStaff CS

Provide 24/7 firm-wide access to software, documents, employee schedules, and more.

### Available on the Apple iPad

What could possibly make Virtual Office CS better? How about lightweight portability? Virtual Office CS is accessible on the Apple iPad.

### What's being said

*"We're impressed with the quality of all products offered in the CS Professional Suite, and the benefits of Virtual Office CS are many-fold. We spend less time worrying about keeping up with the latest releases. We can access all our software and data from anywhere in the world. We LOVE the integration. The products have made us extremely productive and have helped us to operate on the cutting edge of a constantly changing industry. And Virtual Office CS has helped us make "paperless" a reality. Filing, scanning, storing, retrieving, and sharing documents is extremely easy, effective, and efficient. We firmly believe Virtual Office CS is the sensible solution."*

- Hennie van Bulck, SC

*"Virtual Office CS has changed my whole life as a business owner. In the profession today, it's so hard to find good, qualified people. The last person I hired was a stay-at-home mother of three. Without Virtual Office CS, she would have missed out on a career opportunity, and we would have missed out on a great employee. Today's accountants are screaming for 'quality of life' and with Virtual Office CS, we can give it to them."*

- Rich Sherman, NJ
