(Nineteenth Edition—July 2008) | |

of the Tax & Accounting business of Thomson Reuters ("the Company") in effect for the year ended December 31, 2008, and the resultant materials in effect at December 31, 2008, in order to determine whether the materials are reliable aids to assist users in conforming with those professional standards the materials purport to encompass. The design of the system, and compliance with it, are the responsibilities of the Company. Our responsibility is to express an opinion on the design of the system, and the Company's compliance with that system based on our review. Our review did not cover the development of and maintenance of the continuing professional education programs included in the materials.

Our review was conducted in accordance with standards for review of quality control materials established by the Peer Review Committee of the Center for Public Company Audit Firms of the American Institute of Certified Public Accountants (AICPA). In performing our review, we have given consideration to the following general characteristics of a system of quality control. A company's system for the development and maintenance of quality control materials encompasses its organizational structure and the policies and procedures established to provide the users of its materials with reasonable assurance that the quality control materials are reliable aids to assist them in conforming to professional standards in conducting their accounting and auditing practices. The extent of a company's quality control policies and procedures for the development and maintenance of quality control materials and the manner in which they are implemented will depend upon a variety of factors, such as the size and organizational structure of the company and the nature of the materials provided to users. Variance in individual performance and professional interpretation affects the degree of compliance with prescribed quality control policies and procedures. Therefore, adherence to all policies and procedures in every case may not be possible.

Our review and tests were limited to the system of quality control for the development of the aforementioned quality control materials of the Tax & Accounting business of Thomson Reuters and to the materials themselves and did not extend to the application of these materials by users to the materials nor to the policies and procedures of individual users.

In our opinion, the system of quality control for the development and maintenance of the quality control materials of the Tax & Accounting business of Thomson Reuters was suitably designed and was being complied with during the year ended December 31, 2008, to provide users of the materials with reasonable assurance that the materials are reliable aids to assist them in conforming with professional standards in the United States of America applicable to non-SEC issuers. Also, in our opinion, the quality control materials referred to above are reliable aids at December 31, 2008.

LeMASTER & DANIELS PLLC
