

## STATE AND LOCAL TAX CREDITS AND INCENTIVES BATCH

Through its sophisticated geocoding technology, **Credits and Incentives Batch** simplifies the challenge of processing a large volume of addresses to easily identify all the available credits for a particular location.

Each year there are approximately \$80 billion available in federal, state and local tax credits and incentives. Many of these credits and incentives are tied to job growth and investment within a particular zone. Corporations can save millions of dollars per year by determining whether their employees live or their businesses are located in those zones.

Credits and Incentives Batch provides quick and easy access to the federal, state and local statutory and discretionary credits and incentives available for each of your addresses — all at once.

### MAXIMIZE EFFICIENCY AND SAVE TIME

- Quickly find available zone-based statutory and discretionary credits and incentives using high efficiency processing
- Confirm qualifications for specific credits with administrator contact and issuer website information
- Research credits that are typically extremely challenging to locate without this tool, such as employee-based credits or WOTC (Work Opportunity Tax Credit)
- Search by a single address or by multiple addresses
- Ensure credits and incentives opportunities are never missed and are part of strategic location decisions
- License unlimited addresses for just the states you need or purchase a quantity of addresses for all jurisdictions
- Export your results to save, print or review them later

Credits and Incentives certainly is a door-opener. I don't think people realize the amount of state and local tax savings that can be identified as a result of a big Credits and Incentives project by an accounting firm."

— Dean Uminski, Principal at Crowe Horwath LLC
